

## Turtle Graphics Activities

### Activity 1: Scalable House

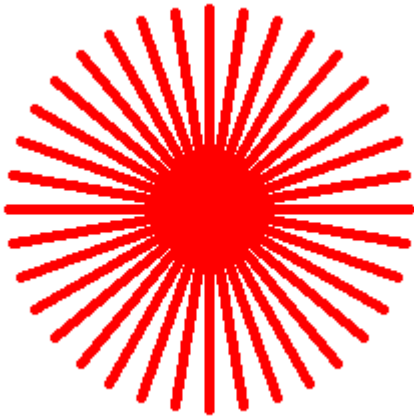

Now that you've got some new tools – parameters and loops – work on your house to make the code as neat as possible and make the house resizable.

### Activity 2: Scalable Star

Can you fill one like I am showing to the left? Can you change its color? What cool star patterns can you create? (*Hint: the angle for a point is 144 degrees*)

### Activity 3: Sunburst

Play with color and pen size to make it look more interesting

## Activity 4: Square Pinwheel
