Exploring CS Fall 2011: Website Design

Starter Website Project Design Sheet:

Project Approved on: 11/___/2011 by _____

Complete this Design Sheet and have it reviewed & approved by Mr. Bergquist before you start main work on your website. The **Starter Website project is due by 3pm on Wednesday, November 23rd** (day before Thanksgiving) in our shared class folder.

1) TOPIC: Describe your topic and the different pages (at least 3) you will be creating on this topic – be explicit on what each page will cover.

2) OVERALL SITE DESIGN: Draw a Mock Up of your overall website design, highlighting the elements that will be shared on all pages especially the navigation (links) to other pages. If needed, use a separate piece of paper and attach it to this document.

3) KEY INFORMATION FOR EACH PAGE: Detail the specific items you will include on each of your web pages (at least 3), like images, links, key paragraphs, lists and other elements that will create your website. You can list these out and/or draw a Mock Up of each. Feel free to attach more pages if needed.
