

Online Safety & Security Group Presentation

Team Assignment:

As a team, prepare a Word Doc to present in class today (last 30 min) on details of your topic:

1. First Define all the key terms you found while reading (like phishing, spyware, malware, etc.)
2. Explain how it works to get your personal information?
3. Highlight what personal information can be captured?
4. Show how it can harm you? For example, steal your money, damage your computer, etc.
5. What can you do to prevent the harm from happening?
6. End with a couple good websites to find the latest details and more information. **Add some new links you have found!**

Save the document including your team members' names in our Class Folder.

TOPICS: These links are only a start - do your own Searches, Find newer Pages!

Do I need antivirus software for my smartphone?
